| <b>Mission, Vision Objectives &amp; Core Values</b> | <p><b><u>Mission</u></b> <i>To turn raw applicant data into simple and clear insights by exploring, checking quality, and using basic visuals, helping understand admission trends and support better decisions.</i></p> <p><b><u>Vision Objectives</u></b>: To create clear data analysis and simple visualizations that turn complex data into useful insights, while working well with a team and following good data analysis practices.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**Objectives:**

To understand the structure and key details of the applicant data

To check and improve data quality by finding missing or incorrect values

To explore the data to find patterns and trends

To create simple and clear visualizations

**Core Values:**

**Integrity** We ensure accuracy, consistency, and transparency in data cleaning, analysis, and visualization.

**Accountability** : *Each team member takes responsibility for assigned tasks (cleaning, EDA, visualization) and contributes reliably to team deliverables.*

**Discipline** We follow structured data analysis processes, maintain clean and reproducible workflows, and ensure high-quality outputs.

**Respect:** *We encourage collaboration, value diverse perspectives, and support constructive feedback within the team.*

**Analytical Thinking & Continuous Learning:**  
*We approach data with curiosity and critical thinking, continuously improving our ability to extract insights and communicate them effectively.*

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| <p><b>Internal Checks, Balances, and Reviews</b></p> | <p><b><u>Task &amp; Role Expectations</u></b></p> <p>Each team member is responsible for completing assigned data analysis and visualization tasks on time. These tasks may include:</p> <ul style="list-style-type: none"><li>• Analyzed dataset structure (7,543 rows and 80 columns)</li><li>• Identified missing values, duplicate records, and inconsistencies</li><li>• Created a detailed data dictionary</li><li>• Performed data cleaning and preprocessing</li><li>• Conducted exploratory data analysis (EDA)</li><li>• Built visualizations using Power BI</li><li>• Derived meaningful insights from the dataset</li></ul> <p><b><u>Role and Responsibility</u></b></p> <p>Dataset Familiarization Summary – Souvik</p> <ul style="list-style-type: none"><li>• Description of dataset structure (rows, columns, variable types)</li><li>• Key observations and initial impressions</li></ul> <p>Data Dictionary – Funke</p> <ul style="list-style-type: none"><li>• Description of dataset structure (rows, columns, variable types)</li><li>• Key observations and initial impressions</li></ul> <p>Data Quality Report – Rahul</p> <ul style="list-style-type: none"><li>• Description of dataset structure (rows, columns, variable types)</li><li>• Key observations and initial impressions</li></ul> <p>EDA &amp; Visualizations – Mayuri (EDA by Everyone)</p> <ul style="list-style-type: none"><li>• Descriptive statistics (mean, median, mode, min, max)</li><li>• Frequency distributions</li></ul> |
|------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Meetings with the project mentor/supervisor will be used to:**

- Present cleaned dataset and initial EDA findings
- Share visualizations and key insights
- Receive feedback on clarity, structure, and analytical approach
- Ensure the project aligns with expected data analysis standards

**Quality Checks & Peer Review**

To maintain high-quality outputs:

- Team members review each other's work (charts, code, analysis)
- Validate:
  - Data accuracy
  - Correct interpretation of results
  - Clarity of visualizations
- Ensure all outputs are consistent and error-free before submission

### Achievable

- Tasks aligned with available tools:
  - Python (Pandas, Matplotlib)
  - Google Colab / VS Code
  - Excel / Google Sheets/ Power BI

### Relevant

- Directly contributes to:
  - Data understanding
  - EDA
  - Insight generation
  - Final report
- Meetings Conducted
  - 9 April 2026: 18:00 – 19:00 IST
  - 10 April 2026: 17:30 – 19:30 IST
  - 13 April 2026: 18.00 – 18.30 IST

|                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
